

# SOUTH PACIFIC FLY-DRIVE HOLIDAY!

The lagoon surrounding New Caledonia is the largest in the world, a haven for tropical marine life, and a UNESCO Heritage Site. And it makes for a stunning adventure playground too, with so much on offer!

## GETTING AWAY

On both coasts of the North, you can get away from it all. Either stay in a hotel or for a traditional camping holiday rent a vehicle and head north to pitch your tent under the palm trees right beside the beach on the lagoon.

## EXPLORING

Now this is what you call a car ferry! With an old petrol engine slung alongside, and guided by ropes, she crosses the river all day long at [Hienghène](#) on the East Coast. It can feel a whole world away when you're up in the North.

## BECOME A COWBOY

Cattle raising is the main farming conducted in the North and there's no better way to get around the rugged hinterland than on horseback. And at [Bourail](#), the annual rodeo held in November is the biggest event in the area!

## ADVENTURE TIME

The North is known as the adventure playground of New Caledonia. Whatever you want, it's here - mountain biking, kayaking, rock climbing, fishing, hiking, horse trekking, quad bike tours, and even hunting for trophy Rusa deer!

## EXPANSIVE VISTAS

All up and down in the Northern Province, the road hugs the coastline in many places, giving you sights to feast your eyes on. Islets in the distance, isolated beaches, and rivers running down from the hill country. Wonderful!

## MYSTICAL LANDSCAPES

South of Nouméa, you could be forgiven for thinking you are on another planet. Mystical scenes and sometimes lunar-like landscapes abound in the [Blue River National Park](#). It is really worth a drive south to see this world.
